Signature _____ Date _____

AMERICAN HEART ASSOCIATION
EMERGENCY CARDIAC CARE PROGRAM
TRAINING CENTER #048 and Agendas

- ✓ Provider manuals are available through your school or instructor.
- ✓ If you were not given an agenda please ask your instructor for one.

LIABILITY STATEMENT FOR ECC COURSES

The course for which you are enrolled may include physical strain, possibility of cross-infection, and emotional stress. If your physician has recommended that you avoid strenuous activity or limit your activity in any way, you need to realize that CPR is hard work! This is true both in practicing on the manikin and doing CPR for the cardiac arrest victim.

If you have a medical, coronary or pulmonary history that may be aggravated by this course, you should consult your physician and ask his/her advice as to whether you should participate in a CPR course.

If you have reservations about being able to perform CPR on a cardiac arrest victim, you should consider this before beginning the course.

If you have recently had any type of infectious disease, including upper respiratory infection or open sores on your mouth or hands, it is imperative to defer manikin practice until you are well.

AHA FEE DISCLAIMER

The American Heart Association strongly promotes knowledge and proficiency in CPR and has developed instructional materials for this purpose. Use of these materials in an educational course does not represent course sponsorship by the American Heart Association, and any fees charged for such a course does not represent income to the association.

GOOD SAMARITAN LAW

48 states have enacted laws to protect persons who render aid from liability. These laws are often called "Good Samaritan" laws. The laws are intended to encourage people to render aid in emergency situations. Contact your District or Regional Service Center for a copy of the applicable laws in your state.
